DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: On line 7, it appears that “ground engage” should be “ground engaging”. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Clark.

Clark discloses an A-frame sign having a pair of folding legs 1, 2 each having a foot, the legs being movable between a first operative folded closed position (not shown) and a second operative unfolded open position (Figs. 2 and 3), a ground-engaging support 4 including a first end and a second end (see Fig. 2), and an interdigitation structure in the form of a screw 5 intermediate the first and second ends for removably attaching the support to the feet.

Regarding claim 5, the system disclosed by Clark (i.e., a screw) would work on feet having round or square cross-sectional shapes, among others.

4. Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Capps.

Capps discloses an A-frame sign having a pair of legs 7, 8 each having a foot spaced apart from the foot on the other leg, and a ground-engaging support 1 including a first end and a second end (see Fig. 2), and a structure 14 for removably attaching the support 1 to at least one of the feet. Note that the structure 14 could be actuated by the user's foot, if desired.
